Professional Summary

AI/ML and Full-Stack Engineer (B.Tech CSE, 2026, CGPA 8.12) with 3 internships building RAG pipelines, agentic AI workflows, machine learning models, and React/Node.js applications. Strong in Python, FastAPI, PostgreSQL, and Databricks, with end-to-end delivery experience using Agile/SDLC practices and 150+ DSA problems solved.

Education

Gyan Ganga Institute of Technology and Sciences — Jabalpur, MP
B.Tech in Computer Science and Engineering – CGPA: 8.12 — *Jul 2022 – Jul 2026*

Technical Skills

- **Languages:** Python, Java, JavaScript, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React, Redux, Node.js, FastAPI, REST APIs, Pandas, NumPy, Scikit-learn
- **Generative AI & LLMs:** Retrieval-Augmented Generation (RAG), Agentic AI, LLM Integration, Vector Search, Embeddings, Prompt Engineering, NLP
- **Machine Learning:** Machine Learning, Deep Learning, Regression, Classification, Time-Series Analysis, MLflow, SHAP
- **Cloud & Platforms:** Databricks, Cloud Deployment
- **AI-Assisted Development:** Agentic IDEs, AI Coding Assistants (GitHub Copilot, Claude), Human-in-the-Loop Development
- **Databases:** SQLite, MySQL, PostgreSQL, MongoDB
- **Tools:** Git, GitHub, Docker (basics), VS Code, Jupyter Notebook, Kaggle, Postman
- **Core CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems

Professional Experience

AI/ML Python Intern — Chennai, TN (Remote)
Geak Minds — *July 2026 – Present*

– Engineered Retrieval-Augmented Generation (RAG) pipelines in Python, integrating LLMs with vector search and embeddings to deliver context-aware, grounded AI responses.
– Built and tested agentic AI workflows automating multi-step reasoning and task execution, applying human-in-the-loop review to improve reliability and output quality.
– Developed and deployed machine learning models on Databricks, owning data pipelines, model training, evaluation, and cloud-based deployment end to end.
– Applied regression, classification, and time-series algorithms, using MLflow for experiment tracking and SHAP for model interpretability and feature-impact analysis.

Frontend Developer Intern — Jabalpur, MP
AKSSAI ProjExel India — *Sep 2025 – Mar 2026*

– Engineered and maintained React-based user interfaces for enterprise applications, integrating REST APIs to power data-driven features and dynamic dashboards.
– Improved application performance through efficient state management, component optimization, and code refactoring for faster rendering and cleaner architecture.
– Built reusable, responsive components and handled API error states, ensuring consistent UX across devices and browsers.
– Participated in debugging, testing, and deployment as part of a full-lifecycle Agile team, contributing to sprint planning and code reviews.

Software Developer Intern — Remote
Elevare Technology — *Jun 2025 – Aug 2025*

– Developed responsive web modules using HTML, CSS, and JavaScript, ensuring consistent behavior and layout across screen sizes.
– Implemented backend API integrations along with search and filtering functionality on structured datasets for faster data retrieval.
– Participated in code reviews, testing, and SDLC activities, applying analytical skills to diagnose and resolve technical issues.
– Collaborated with the team using Git-based workflows, delivering assigned modules on schedule within an Agile process.

Projects

BAYMAX – AI-Assisted Mental Health Platform — 2026
Python, FastAPI, PostgreSQL, LLM/RAG, NLP

– Designed and built a full-stack AI platform integrating LLM-based conversational assistance and RAG-driven contextual responses, backed by a FastAPI and PostgreSQL service layer.
– Built dashboards for user activity and wellness analytics, applying NLP techniques to improve interaction quality, personalization, and system reliability.

Smart Complaint & Issue Management System — 2025
React, Node.js, PostgreSQL, REST APIs

– Designed and developed a full-stack complaint management system with role-based workflows, following SDLC best practices from design through deployment.
– Implemented REST APIs and a relational database schema for issue tracking, status updates, and reporting, enabling end-to-end complaint lifecycle management.

Certifications & Coursework

- **Certifications:** Java & Data Structures and Algorithms; Full Stack Web Development — Apna College
- **Coursework:** Software Engineering, Cloud Computing, DBMS, Computer Networks, Operating Systems, Machine Learning
- **Problem Solving:** Solved 150+ DSA problems on LeetCode and HackerRank
